WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

Areas of rain continue Thursday into Friday with rain showers and mountain snowfall above about 7000 ft. Drier conditions expected early in the weekend, followed by increased chances for additional rain and mountain snow Sunday. Highs will be near normal in the 60s, with 40s and 50s in the mountains.

A wet unsettled weather pattern will continue through today. Most of the precipitation will be in the form of numerous mountain showers, with valleys seeing a mixture of occasional showers and breaks in the clouds, with more sunny breaks farther south. Snow levels will be near 5000 ft near the OR state line and 7000 ft near Lake Tahoe. Southerly gusts to 35-50 mph are possible at higher wind-prone locations, with 20-30 mph gusts common elsewhere.

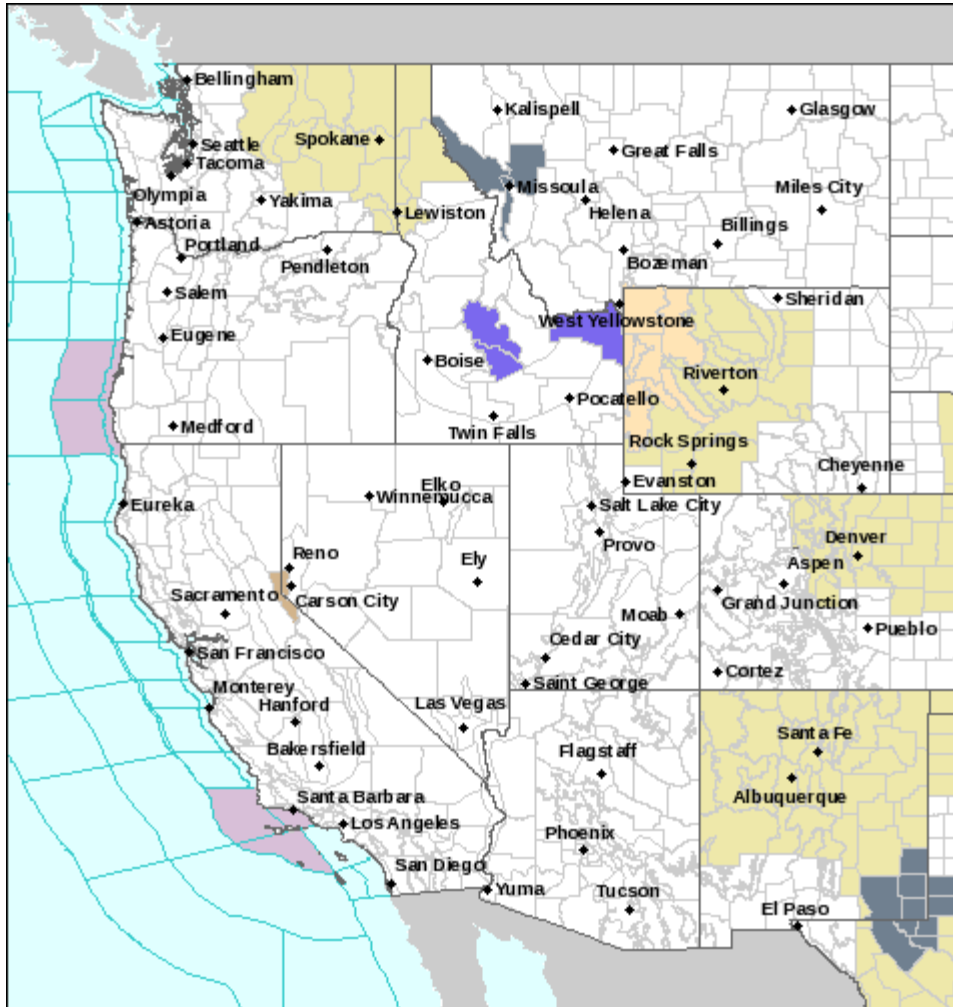

SOUTHERN CALIFORNIA

Near normal temperatures. Chances for rain showers along the Central Coast and southern Sierra Nevada snow showers increase Thursday. Otherwise, dry conditions are expected. High temperatures warming to lower 70s by mid-week, with 50s in the mountains, and lower 80s in some desert areas.

There will be very little change in the weather through the end of next week as our region lies in between low pressure over the Pacific Northwest and high pressure over Mexico. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas through tonight and then again Monday through the end of next week. Gusty northerly winds will occur over Santa Barbara County and the Grapevine Monday night. Temperatures will be near normal, with 50s to low 60s across the mountains and mid 60s to mid 70s in the valleys. No rainfall is expected across the region through early next week and then some light showers may occur over Central California sometime during the middle to end of next week.
